

Lean Supply Chain Workshop

About the Workshop

This workshop is designed for Lean Six Sigma practitioners and supply chain professionals wishing to collaborate more effectively on continuous improvement activity in the supply chain space.

The participants will receive 7 hours of an interactive learning experience focused on application of concepts, and a hard copy of the workshop materials.

Learning Objectives

- Understand fundamental definitions and principles of supply chains
- Define the attributes of a Lean supply chain
- Apply Lean concepts to supply chain processes
- Describe the path to a Lean supply chain and the improvement focus areas
